License File Number: BZ-20041209ABZ

Grant Date: January 19, 2006

This license expires 3:00 a.m.
local time, October 01, 2011.

Subject to the provisions of the Communications Act of 1934, subsequent acts and treaties, and all regulations heretofore or hereafter made by this Commission, and further subject to the conditions set forth in this license, the licensee is hereby authorized to use and operate the radio transmitting apparatus herein described.

This license is issued on the licensee's representation that the statements contained in licensee's application are true and that the undertakings therein contained so far as they are consistent herewith, will be carried out in good faith. The licensee shall, during the term of this license, render such broadcasting service as will serve the public interest, convenience, or necessity to the full extent of the privileges herein conferred.

This license shall not vest in the licensee any right to operate the station nor any right in the use of the frequency designated in the license beyond the term hereof, nor in any other manner than authorized herein. Neither the license nor the right granted hereunder shall be assigned or otherwise transferred in violation of the Communications Act of 1934. This license is subject to the right of use or control by the Government of the United States conferred by Section 606 of the Communications Act of 1934.

Special operating conditions or restrictions:

- DESCRIPTION OF DIRECTIONAL ANTENNA SYSTEM
No. and Type of Elements: Five(5) uniform cross-section, vertical, guyed, series excited, steel base insulated radiators.

Ground System consists of 120 equally spaced buried copper radials about the base of each tower 195 feet in length except where terminated by property boundaries or where intersecting radials are shortened and bonded, plus an additional 120-50' long radials interspersed between longer radials.

Special operating conditions or restrictions:

2 DESCRIPTION OF AND FIELD INTENSITY MEASURED AT MONITORING POINTS:

Direction of 53 True North. At the entrance of the Fleetwood Farm (which off Route 785), enter farm lane and go 0.15 mile to the farm house and farm buildings. Park car and walk to the southeast edge of the farm buildings. Point is located 75 feet from buildings near junctions of fences and gates. The point is located 3.7 km from the site. The field intensity measured at this point should not exceed 2.2 mV/m, night.

Direction of 87 True North. From intersection of Route 29 and Route 649, turn right (East) on Route 649 and proceed 1.95 miles to Mail Box 135 (just past or south of Wood Processing Plant). The point is located at the west side of the road in the middle of the driveway, associated with Mail Box 135. This point is 2.74 miles from the site. The field intensity measured at this point should not exceed 48.7 mV/m, day.

Direction of 179 True North. Depart East from site to Route 29. Turn right (south) on Route 29 and proceed 1.7 miles to Route 854 (East). It is necessary to continue past route 854 as Route 29 is a divided highway and make a turn around coming back (North) 0.15 mile to Route 854, then turn right (East) and continue for 1.25 miles (dead end). Turn right (South) on Route 1428 (Huntington Road) and proceed 0.21 mile to Mail Box 2707 on West side of the road. The point is located at the east edge of the road directly across from mail box 2707. This point is located 3.72 km from the site. The field intensity measured at this point should not exceed 109.7 mV/m, day.

Direction of 220 True North. From intersection of Route 631(Rio Road) and Four Seasons Drive, turn left (South) on Four Seasons Drive and proceed approximately 100 feet. The point is on the West edge of Four Seasons Drive and located on a line between the 2nd house (gray) and 3rd house (brown) which are on the adjacent road to the East. This point is 4.43 miles from the site. The field intensity measured at this point should not exceed 20.45 mV/m, night.

Direction of 271 True North. From intersection of Route 660 and Route 1532, turn left on Route 1532 (south) for 0.11 mile then again left (east) on Route 1533 (Hickory St) and continue for 0.16 mile to point. The point is on the southwest side of the road 75 feet west of Mail Box 425. This point is located 5.23 km from the site. The field intensity measured at this point should not exceed 18.9 mV/m, day.

Direction of 289 True North. From intersection of Route 743 and Route 844, turn right (west) on Route 844 for 1.75 miles to end of the public road (End of State Maintenance). The point is located on the north edge of the turn-around at entrance to private land. This monitoring point is located 2.77 km from the site. The field intensity measured at this point should not exceed 3.2 mV/m, night.

Direction of 344.5 True North. From intersection of Route 606 and Route 743, turn right (North) on Route 743. Proceed 2.4 miles thru Earlysville, at junction of Routes 663 and 743, continue on Route 743 and proceed 0.63 mile to the point. Just prior to the point is a metal gate leading to a house some distance from the North side of the Road, and the gate is on a brow of a rise. The point is 150 feet East of the date on the North edge of the road. This point is located 5.44 km from the site. The field intensity measured at this point should not exceed 7.2 mV/m, night.

Special operating conditions or restrictions:

- 3 Direction of 359.5 True North. From intersection of Route 606 and Route 743, turn right (North) on Route 743. Proceed 2.4 miles thru Earlysville, at junction of Routes 663 and 743, continue on Route 743 (East) and proceed 2 miles to drive of Jacob's Run Farm; then continue 0.05 mile to point. The point is located on the south edge of the road and is marked by a paint spot. This point is located 6.6 km from the site. The field intensity measured at this point should not exceed 22.6 mV/m, day.
